RE: STATUS OF KINGSLAND WATER SUPPLY CORPORATION DROUGHT CONTINGENCY PLAN

Dear Water Consumer:

Due to the recent rainfall and rising lake levels of Lake Buchanan and Lake Travis along with the Lower Colorado River Authority (LCRA) relaxing the *Drought Rate* structure, Kingsland Water Supply Corporation (KWSC) is resuming normal water usage requirements for all members. At this time, the watering schedule is as needed for all members.

We would encourage everyone to remain conscious of the need to conserve water in any activities. Sprinkler systems should still be set to work during the morning and evening hours, and also adjusted to minimize any runoff to streets or adjacent properties. Any leaking fixtures should be repaired in a timely manner to conserve water and also to save on your water bills. More water conservation ideas are on our website at www.kingslandwater.org or on the LCRA website at www.lcra.org

We appreciate your cooperation. If you have any questions, please feel free to call the KWSC office at (325) 388-6611.

Sincerely,

Leonard Leinfelder
General Manager
